

WP SERIES

Lifter - Transporters

- Lift, Position and Transport
- Up to 440 Pound Capacity
- Lift Heights up to 69 Inches

WP Series Powered Lifter - Transporters from Interthor are the perfect work positioner/transporter for Industrial, Laboratory, Office and "White Coat" Industrial applications. They are available with a range of capacities from 130 lbs. to 440 lbs. and lifting heights from 4 inches to 69 inches.

A continuous lifting chain in the center mast provides smooth stops and starts and constant lifting and lowering speed. It also allows operators to precisely position loads. And, because it is mechanical, there is no drift and no potential for loss of hydraulic fluids. The mast itself is narrow enough for operators to see clearly around either side for maximum safety. Two swivel and two fixed casters give the units superior maneuverability. Its small footprint allows it to go effortlessly into tight spaces or around obstacles.

Here are just a few places where you could use a WP Series Lifter - Transporter:

**Electronic Assembly Area
Clean Rooms
Stock Rooms
Laboratories
Test Station
Quality Assurance Departments
General Maintenance
Office**

Interthor

Loaded With the Features You Need

WP Series Lifter - Transporters are built tough to provide years of trouble-free service. They are packed with features designed to enhance performance, improve worker safety and maximize ease-of-use.
